PROFESSIONAL SUMMARY

AI/ML Engineer and Full-Stack Developer with practical experience designing scalable web architectures and conversational AI pipelines. Proficient in Python, Java, FastAPI, and modern JavaScript stacks, with proven capability in building LLM-integrated workflows, RAG systems, and resilient RESTful services. Adept at bridging AI inference with production-ready software systems.

EDUCATION

Mohan Babu University

B.Tech in Computer Science & Engineering (AI & ML) – CGPA: 8.06/10

Tirupati, Andhra Pradesh

Graduation: 2026

Sree Bharathi Junior College

Class XII (Intermediate - MPC) – Percentage: 61.9%

Eluru, Andhra Pradesh

2020 – 2022

Sree Bharathi School

Class X (SSC) – Score: 99%

Eluru, Andhra Pradesh

Passed: 2020

TECHNICAL SKILLS

Languages: Python, Java, C, JavaScript, SQL

AI/ML & LLMs: RAG Pipelines, Vector Databases (Qdrant), LLM API Integration, Prompt Engineering, LangChain

Backend & Full-Stack: FastAPI, Node.js, Express.js, React.js, RESTful APIs, HTML5, CSS3, Tailwind CSS

Databases & Cloud: MongoDB, MySQL, AWS (EC2, S3, RDS, Lambda), Vercel

Tools & Practices: Git, GitHub, Postman, JWT Authentication, Object-Oriented Design, System Debugging

WORK EXPERIENCE

Intern – Full Stack Developer

Asian Technology Solutions Pvt Ltd

Hyderabad, India

Dec 2025 – June 2026

- Engineering scalable web applications by implementing end-to-end full-stack architectures.
- Developing modular RESTful APIs and schema-optimized database models integrated with dynamic frontend interfaces.
- Collaborating with cross-functional development teams to deploy reliable features into real-world production environments.

Full Stack Developer Intern

Doctor Appointment & Health Record System

Remote / Project-Based

July 2025 – Sept 2025

- Developed a full-stack healthcare portal featuring role-based access control (Doctor, Patient, Admin) utilizing React.js, Express.js, Node.js, and MongoDB.
- Built and secured 15+ RESTful endpoints with JWT authentication and strict session validation.
- Tested, documented, and validated API contracts using Postman to ensure stable data flow and zero regression.

FEATURED PROJECTS

Enterprise RAG Knowledge Engine | Python, FastAPI, LangChain, Qdrant, React, OpenAI

- Built an enterprise-grade RAG pipeline capable of ingesting and semantically chunking multi-page PDF documentation.
- Deployed vector embeddings into a Qdrant database to execute low-latency contextual semantic retrieval.
- Constructed prompt guardrails to mitigate hallucinations and ensure grounded factual responses.

Healthcare AI Chatbot | FastAPI, Python, MongoDB, JWT, LLM APIs

- Designed an interactive AI triage assistant handling real-time healthcare queries with contextual intelligence.
- Enforced strict prompt-level safety boundaries preventing unauthorized clinical prescriptions and routing urgent symptoms safely.
- Configured MongoDB storage for persistent chat histories alongside JWT authorization.

CERTIFICATIONS & CORE STRENGTHS

Certifications: Full Stack Developer Internship Certificate (Asian Technology Solutions), Machine Learning for Computer Vision (MathWorks), Python Essentials 1 & 2 (Cisco), Introduction to Cybersecurity (Cisco)

Core Strengths: Analytical Problem-Solving, Cross-Disciplinary Architecture Design, Fast-Paced Technology Adoption, Root-Cause Debugging, Collaborative Agile Execution
